## **THREE DOG FOODS THAT WE RECOMMEND FOR YOUR DOG**

In this section, selections of three dog food brands have been discussed. Their ingredients have been listed along with other facts and information that will be of benefit for the owner and the dog. These three brands are considered some of the best in the market today.

Despite the 2007 disaster, commercial dog foods happen to be the most popular form of dog food in the market. This is because of three primary reasons:

- ü You're simply not much of a cook,
- ü There's the whole (obvious) convenience factor, and
- ü You may not be confident in your abilities to correctly ascertain your dog's needs, and the appropriate nutritional balance.

While selecting these 3 commercial dog foods, we have ensured that they provide the best nutrients and balance that your dog requires. These manufacturers follow the AAFCO standards as well as other government standards placed upon them.

These commercial dog food brands are very high quality dog foods and meet the dietary requirements of dogs and often exceed them.

High quality commercial foods use the best ingredients available and take pride in providing their customers and customer's pets with the best options in dog food.

<http://www.trainpetdog.com/Dog-Diet/dog-diet.php?src=cmm>

For the sake of variety, you will find many brands in this list, aside from those you might be familiar with. This is to display the many varieties and kinds of dog food available and to give owners an insight into what else is available if they choose to go with something other than the brands they are feeding now.

It is important to remember that dogs come in a variety of shapes and sizes, and that this affects their dietary needs. While the brands listed here are among the best, owners must be cautious about feeding their dogs new food and must always take all the variables into consideration. Compare these foods to one another and then to what your dog's needs are.

A veterinarian will be able to assist you when it comes to changing foods as they can tell you what your dog needs in the way of nutrients.

As such, for the kitchen-challenged, the impossibly busy, and the faint-of-heart pet owners we have researched and assembled specifically for your convenience the best possible alternative commercial pet foods currently available on the market.

## TOP THREE DOG FOODS

### Orijen 6 Fish Dog Food

Orijen is a family-owned and operated Canadian pet food maker. With a tradition of innovation & quality spanning more than a quarter century, they have won the Pet Food of The Year Award in 2009-2010 by the Glycemic Research Institute. They use fresh regional ingredients to produce Biologically Appropriate foods – that ensures a long and healthy life for dogs.

#### A. What are it's benefits?

- ü High-protein and low-carbohydrate content replicates the same rich and diverse balance of fresh meats, fruits, vegetables and grasses that puppies and young dogs of all breeds would encounter in their natural setting.
- ü Protein from fish ingredients that are passed 'fit for human consumption'
- ü By providing more calories from protein and fewer calories from carbohydrate, ORIJEN reduces the risk of obesity, insulin resistance and diabetes
- ü Instead of cereal grains it provides a full complement of regional fruits and vegetables-sweet & russet potatoes, red apples & cranberries and organic sea vegetables.
- ü Salmons used are never frozen and provide a superb source of Biologically Appropriate Omega-3s (DHA and EPA) that support the development of cell membranes and immune systems, as well as a vibrant skin and hair coat - your dog's outer symbol of health and vitality.

**Copyright (c) 2008-2009 Trainpetdog.com All Rights Reserved.**

- ü Veterinarian selected botanicals, including dandelion root, sweet fennel & peppermint leaf soothe, nourish and tone the digestive tract while strengthening the liver.
- ü Calcium and phosphorus levels are moderate and of natural source.
- ü Fresh chicken and turkey cartilage provides a natural and high source of glucosamine and chondroitin.

## B. Ingredients

Fresh deboned salmon, salmon meal, herring meal, russet potato, fresh deboned lake whitefish, sweet potato, peas, salmon oil (preserved with vitamin E), fresh deboned walleye, fresh deboned herring, sun-cured alfalfa, fresh deboned flounder, fresh deboned lake trout, dehydrated organic kelp, pumpkin, carrots, spinach, turnip greens, apples, cranberries, saskatoon berries, black currants, choline chloride, psyllium, licorice root, angelica root, fenugreek, marigold flowers, sweet fennel, peppermint leaf, chamomile flowers, dandelion, summer savory, rosemary, sea salt, vitamin supplements (vitamin A, vitamin D3, vitamin E, niacin, vitamin C, thiamine mononitrate, riboflavin, vitamin B5, vitamin B6, folic acid, biotin, vitamin B12), mineral supplements (zinc proteinate, iron proteinate, manganese proteinate, copper proteinate, selenium), dried Lactobacillus acidophilus product, dried Enterococcus faecium fermentation product.
